

CREATIVE AUDIO-VISUAL SOLUTIONS

CREATIVE at work

New Testament Assembly, SW17

Creating the Complete Solution

The main church showing six flown Electrovoice SX300 speakers with two 2 x 18" subwoofers below – powered and controlled by EV and DBX amplification and processing.

An Allen & Heath ML4000 48 Channel Mixing Console is the nerve centre for the audio system. It offers VCA and Group Busses, LCR Control, Matrix Outputs, 12 Monitor Auxiliaries, PC Snapshot Memories and pristine sound quality.

At the New Testament Assembly Church, SW17, Creative Audio-Visual Solutions were commissioned to supply and install probably the most advanced and comprehensive installation within a Church in the United Kingdom. With the support of many of the leading manufacturers in audio, audio-visual and reprographics, Creative were able to offer the complete solution to assist this prospering Church to further growth and development in all areas of Worship and Ministry. Here we examine the many facets of this installation and assess the benefits of Churches using one forward thinking company to supply the complete solution for all their future requirements.

With such an advanced audio-visual system in place, NTA wanted to be able to produce and distribute their own DVDs. Here you can see the Datavideo SE-800 vision mixer (used to monitor and record the various camera inputs to hard disk) linked to a custom designed recording and editing suite using Adobe Premiere and DVStorm software. Below is a Sony remote camera discreetly installed for close-ups of Baptisms and on-stage Ministry. Two further 'roving' semi-professional DV cameras were supplied to cope with all other requirements. Custom AV optimised laptop installed with Songpro V4 song management software also shown.
