

# CREATIVE AUDIO-VISUAL SOLUTIONS

St James' Parish Church, Trowbridge

## Aesthetic Technology

**Creative Audio-Visual  
Solutions**

*Bespoke AV Solutions*

The installation by CAVS at St James' Trowbridge is a perfect example of the effective but sympathetic integration of modern AV technology into a traditional parish Church. JBL beam array column speakers with discreet subwoofers blend effortlessly to provide high quality sound from speech to full range band amplification. Three smart winch projection screens and 7,500/5,000 lumen projectors ensure the highest image quality throughout the congregation whilst providing the ability to hide out of sight when not in use. All operating equipment is housed within a bespoke console – utilising old pews to blend into the Church's décor. An HD motorised camera with recording and streaming capability was also installed to capture services/events and to provide long term system development potential.
